

i500 PC Configuration

I. Minimum specifications for Lap/Desktop

Preparing Console PC

Minimum specifications for Laptop

Operating System	Microsoft Windows 10 64 Bit (32 Bit – not available)
CPU	Intel i7-8700/8700K or higher
RAM	16GB or higher
Graphic Card	Nvidia GeForce GTX 1060 (3GB) or higher
Verified Laptop	TBD (manufacturer & its model)

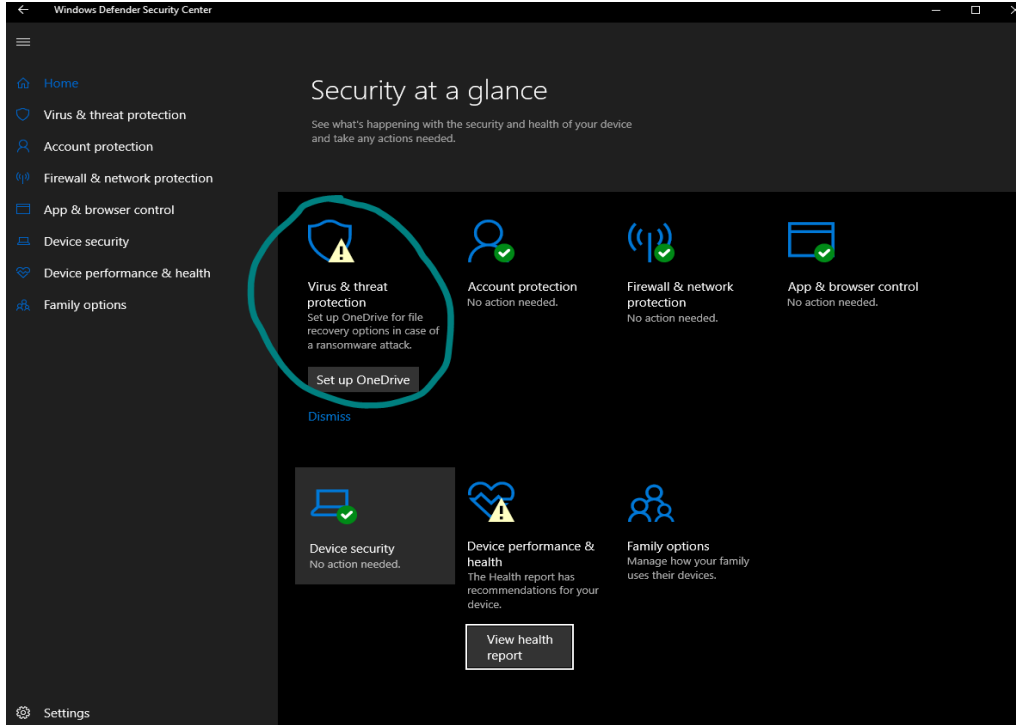

Minimum specifications for Desktop

Operating System	Microsoft Windows 10 64 Bit (32 Bit – not available)
CPU	Intel i7-8700/8700K or higher
RAM	16GB or higher
Graphic Card	Nvidia GeForce GTX 1060 (3GB) or higher
Verified Desktop	TBD (manufacturer & its model)

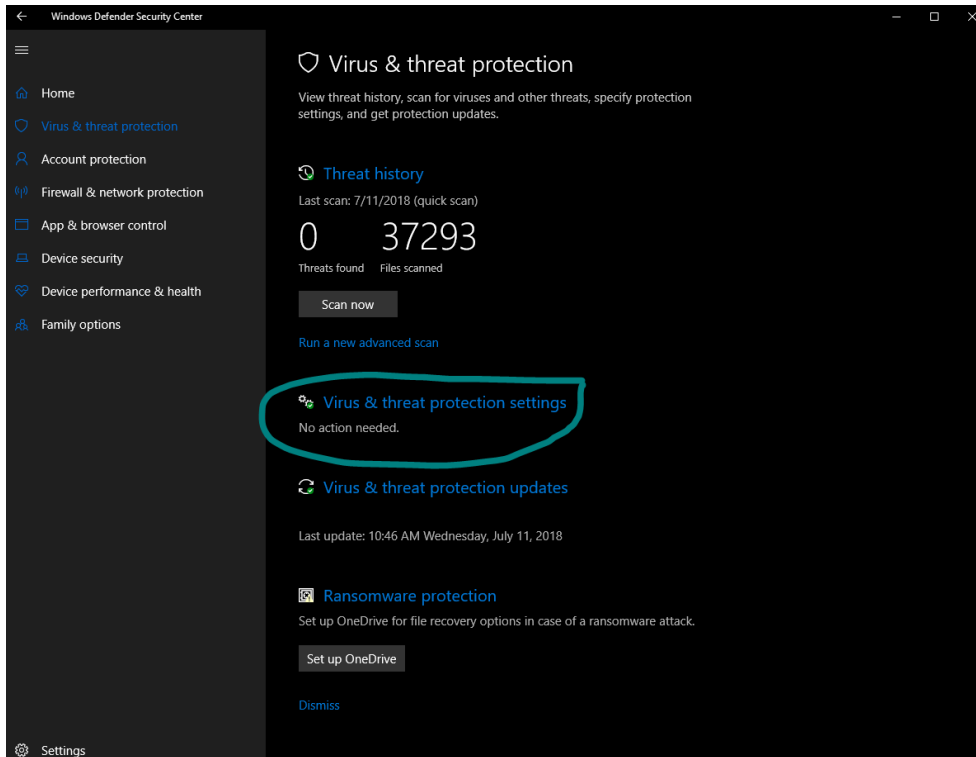

** CPU minimum specification has been changed to Intel i7 8750/8750K or higher

II. Exclude all folders associated with the i500 software through Windows Defender

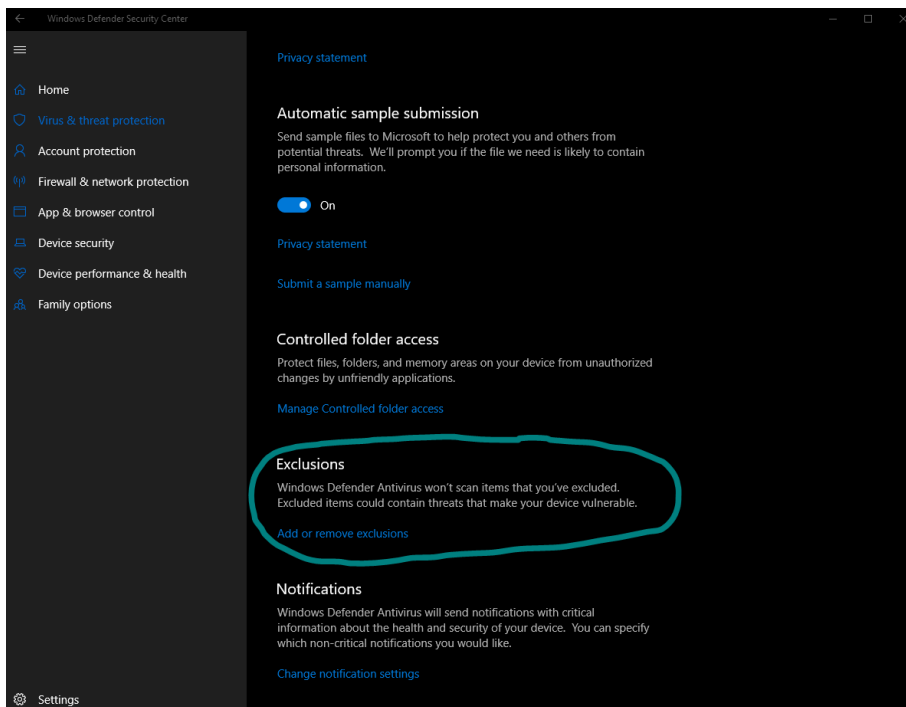

➔ Open Windows Defender and click on “Virus & threat protection”

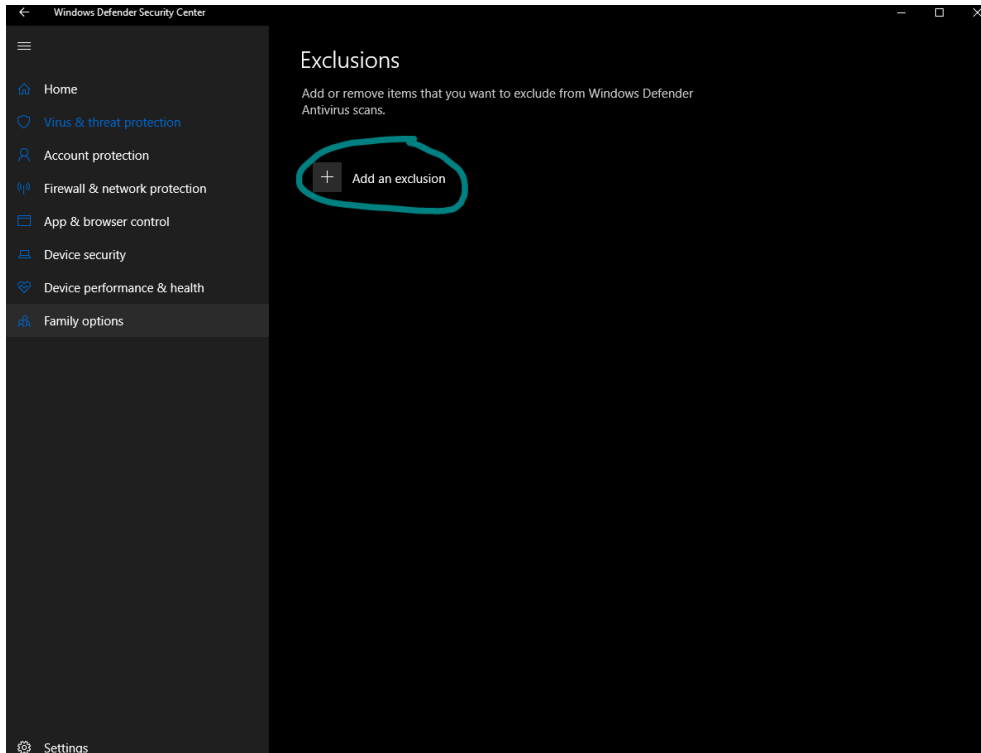

➔ Select “Virus & threat protection settings”

➔ Scroll down to “Exclusions” and select “Add or remove exclusions”

➔ Select “Add an exclusion” and select “folder”

➔ Please exclude the following folders:

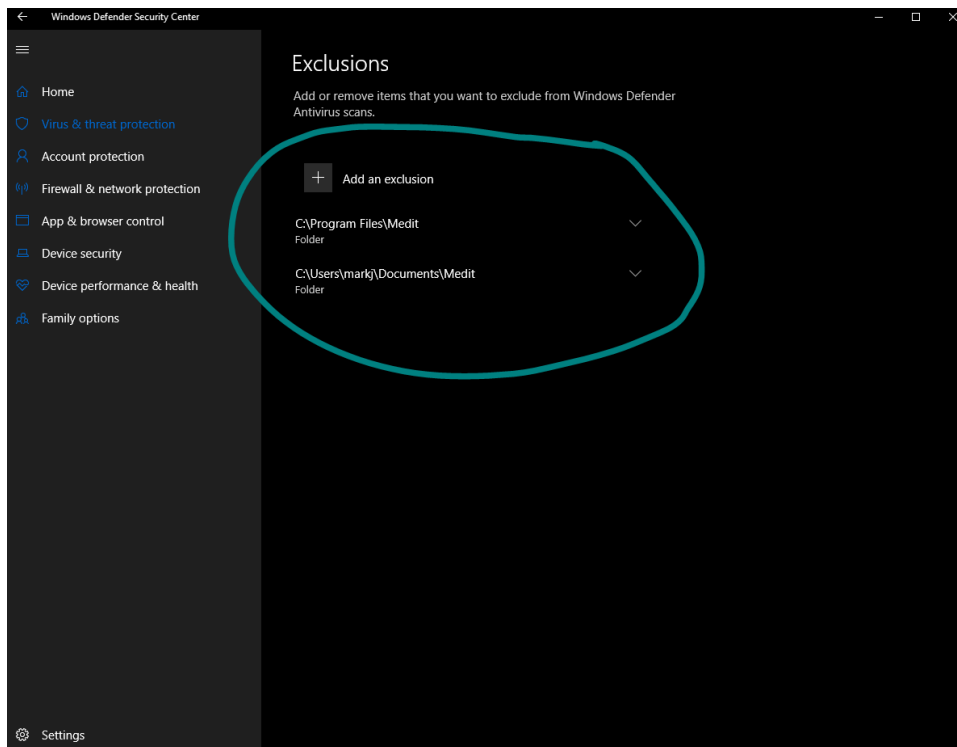

C:\Users\marki\Documents\Medit

C:\Program Files\Medit

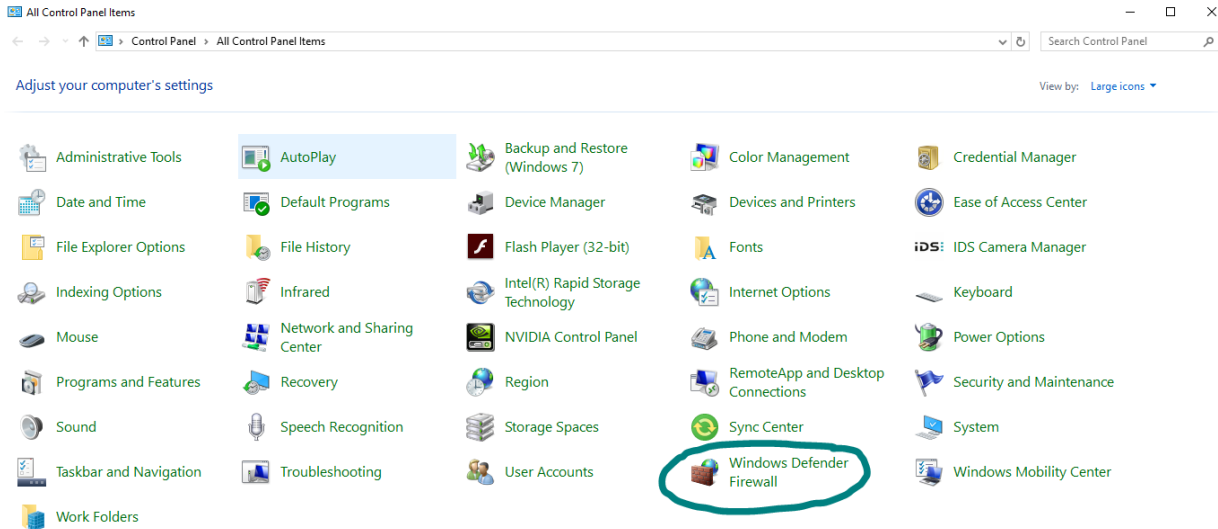

➔ After selecting the two folders, you will see that the folder locations have been excluded in Windows Defender

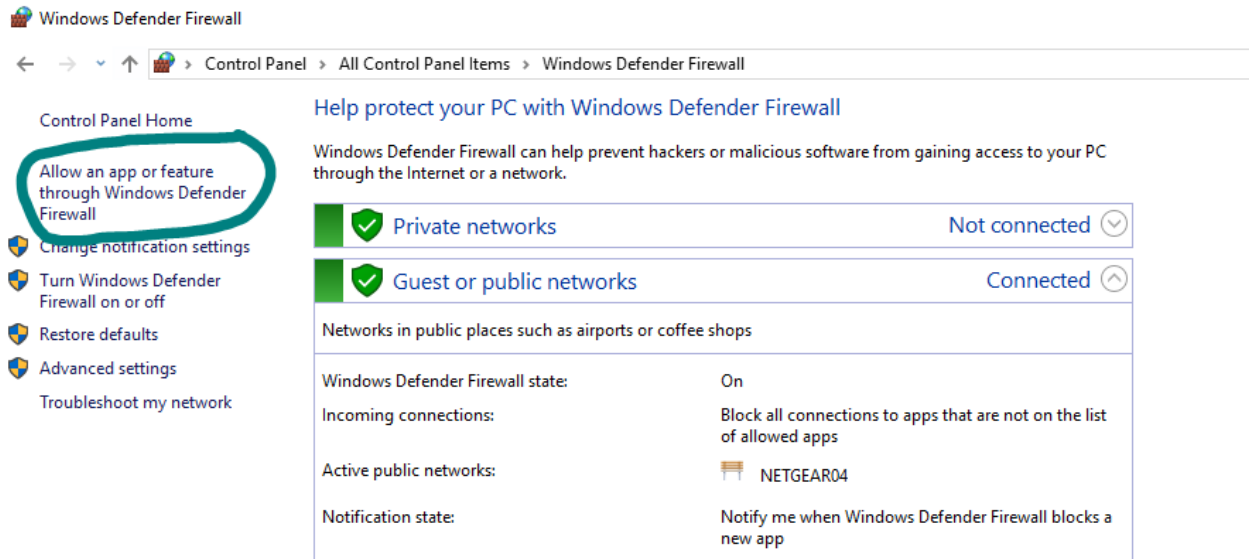

III. Block Medit Programs with Windows Firewall

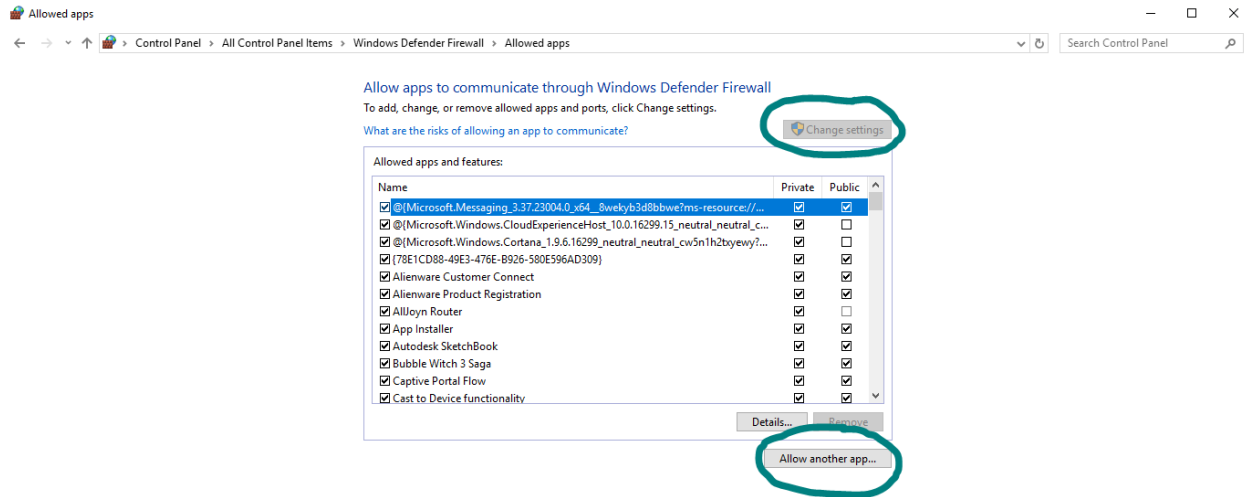

➔ Go to Control Panel and locate “Windows Defender Firewall”

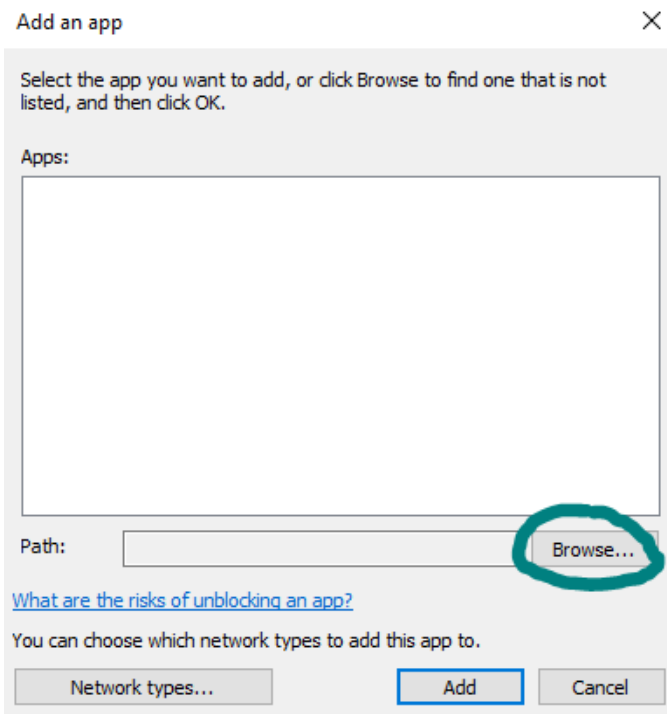

➔ Select “Allow an app or feature through Windows Defender Firewall”

➔ Select “Change Settings” and then select “Allow another app...”

➔ A window will appear. Please select “Browse”

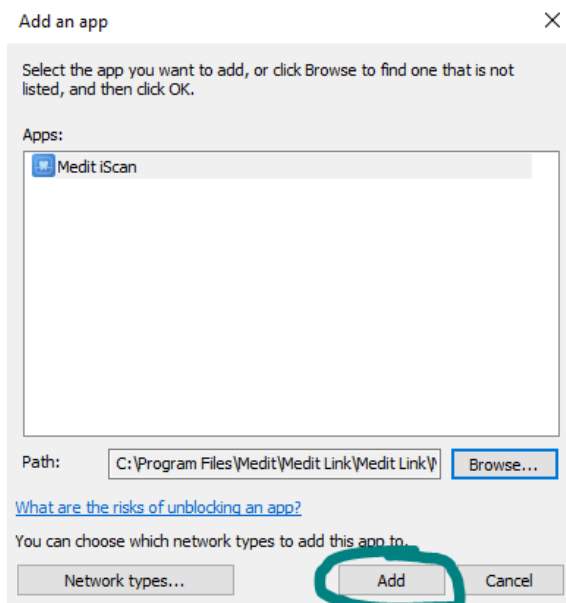

➔ Navigate to this file location:

C:\Program Files\Medit\Medit Link\Medit Link

- Please select “iScan” and click on “Open”

➔ When window appears with attached file location, press “Add”

- You will need to follow the same steps for the following items
- “Medit_Link”
 - “Medit_Link_TaskManager”
 - C:\Program Files\Medit\Medit Link\MeditUpdateManager
 - o “MeditUpdateManager”

** These four items should show up on the list of apps allowed through Windows Firewall

- Medit iScan, Medit Link, Medit Link Task Manager, and MEDIT Update Manager

Allow apps to communicate through Windows Defender Firewall

To add, change, or remove allowed apps and ports, click Change settings.

What are the risks of allowing an app to communicate?

Allowed apps and features:

Name	Private	Public
<input checked="" type="checkbox"/> Medit iScan	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Medit Link	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Medit Link Task Manager	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> MEDIT Update Manager	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Microsoft Content	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Microsoft Edge	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Microsoft family features	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Microsoft Messaging	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Microsoft News	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Microsoft Office Desktop Apps	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Microsoft Pay	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Microsoft People	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

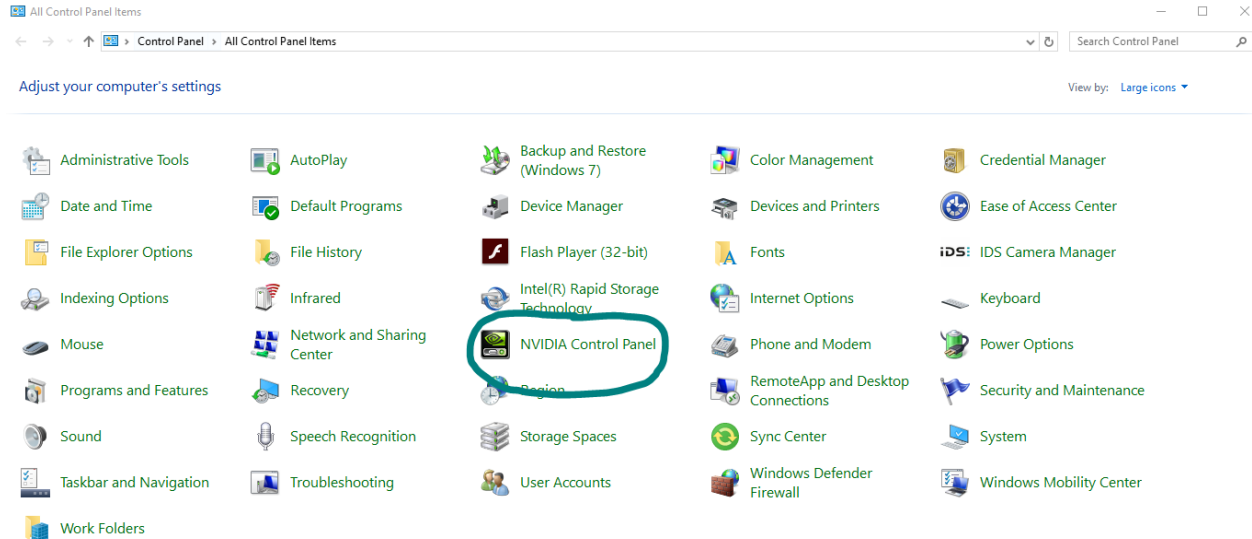

→ Please confirm that Medit Apps are being allowed in both Private and Public

Allowed apps and features:

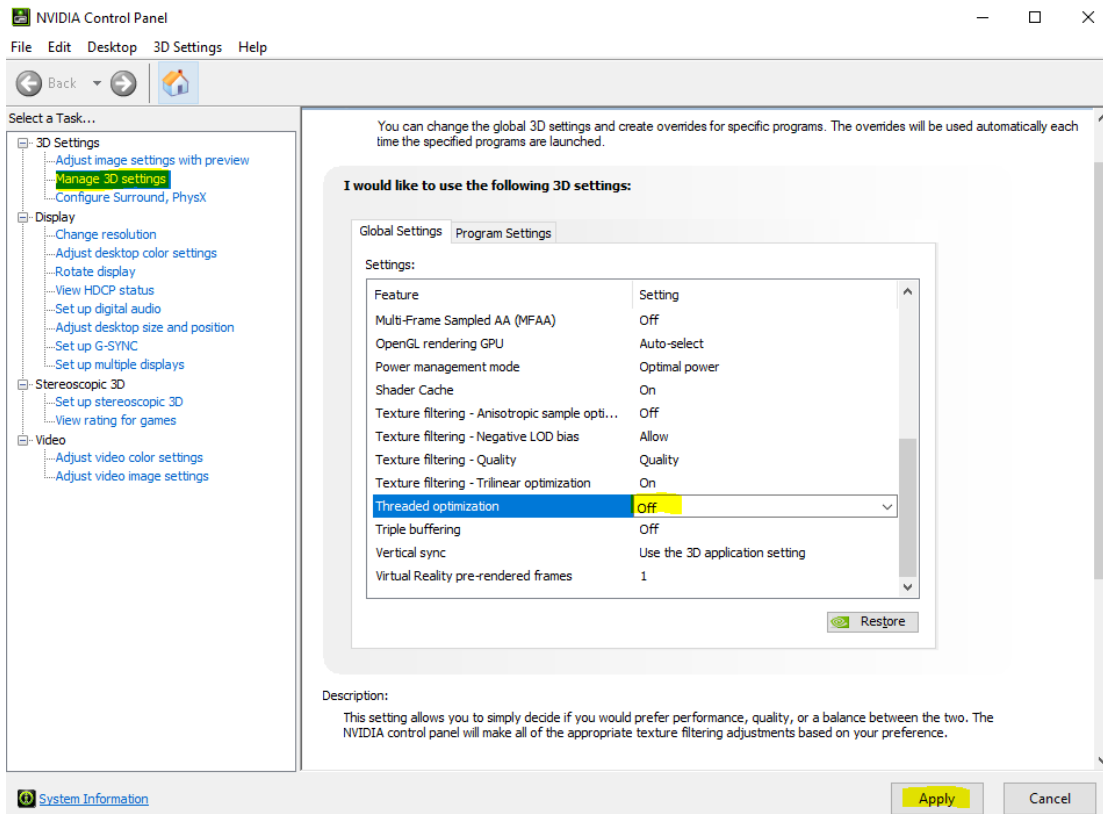

Name	Private	Public
<input checked="" type="checkbox"/> Medit iScan	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Medit Link	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Medit Link Task Manager	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> MEDIT Update Manager	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

IV. Turn off “Threaded Optimization” through NVIDIA Control Panel

➔ Go to Control Panel and locate “NVIDIA Control Panel”

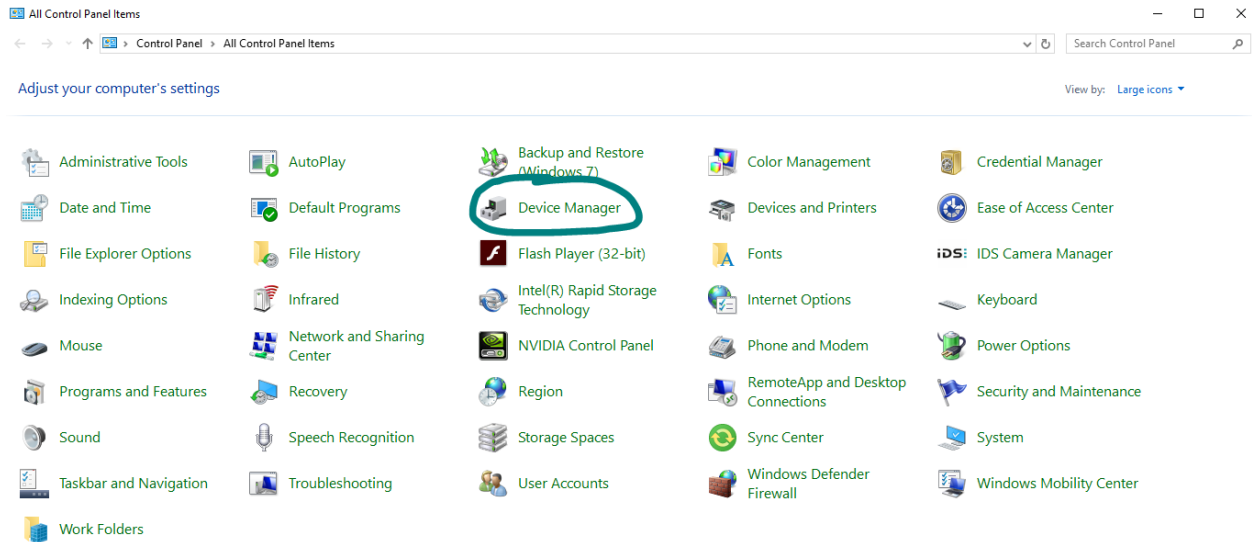

➔ Go to “Manage 3D settings” and scroll down to “Threaded optimization”
- Please change the option from “Auto” to “Off” and select “Apply”

V. Check all necessary drivers for updates

➔ Go to Control Panel and select “Device Manager”

- ➔ Locate the “Intel” and “NVIDIA” Display Adapters and right click on each driver.
- Select “Update Driver”
 - Select “Search automatically for updated driver software”
 - If drivers need to be updated, it will show that the driver is being downloaded

- Once downloaded, the system will install the driver

← Update Drivers - Intel(R) HD Graphics 630

Installing drivers...

- System will notify you once the drivers have been successfully downloaded

← Update Drivers - Intel(R) HD Graphics 630

Windows has successfully updated your drivers

Windows has finished installing the drivers for this device:

Intel(R) HD Graphics 630

Close

- If driver is up to date, the system will state the best driver has already been installed.

← Update Drivers - NVIDIA GeForce GTX 1080

The best drivers for your device are already installed

Windows has determined that the best driver for this device is already installed. There may be better drivers on Windows Update or on the device manufacturer's website.

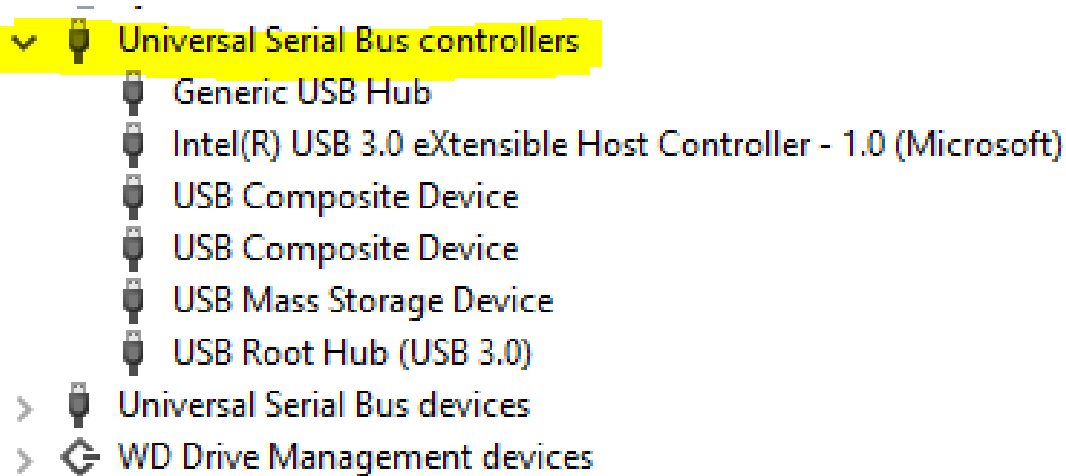

NVIDIA GeForce GTX 1080

→ [Search for updated drivers on Windows Update](#)

Close

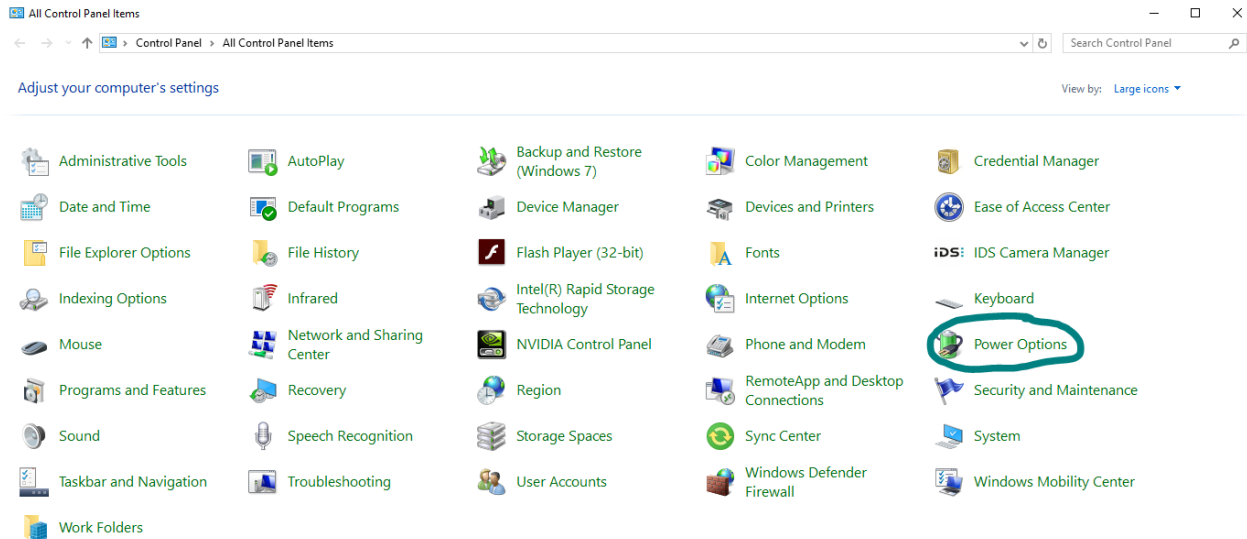

→ Go back into Device Manager and locate the "Universal Serial Bus controllers".

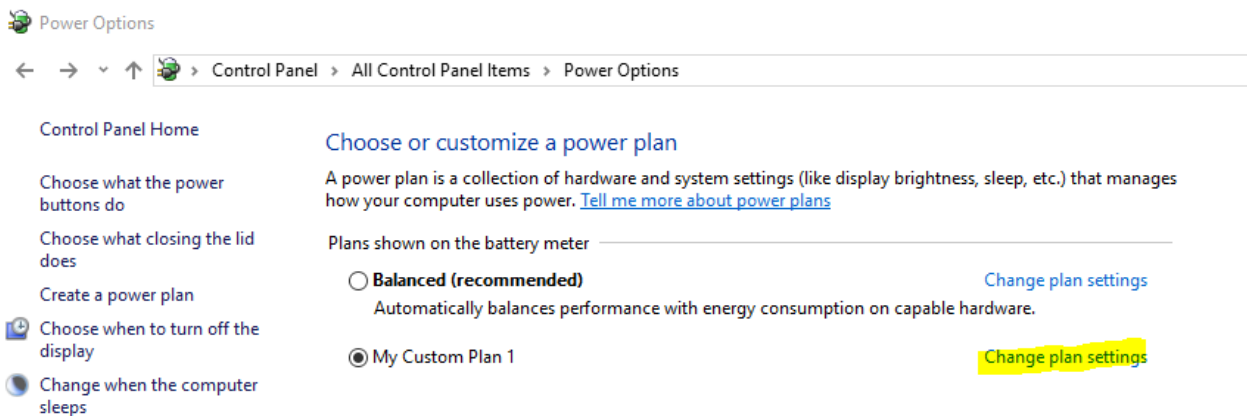

➔ Please follow the same steps for and update all USB drivers found on Device Manager.

VI. Disable “USB selective suspend settings”

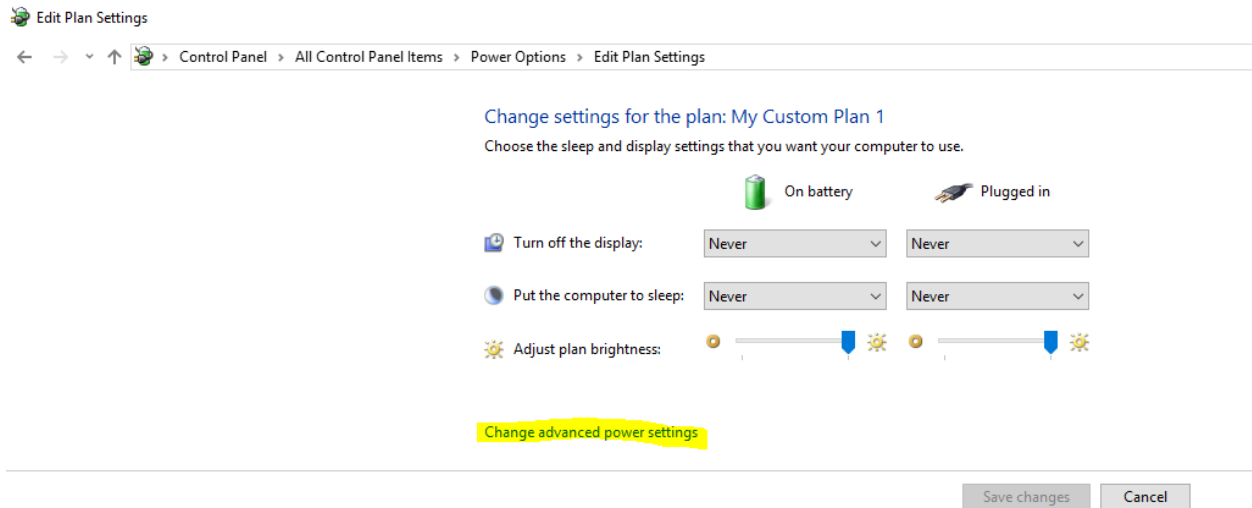

➔ Go to Control Panel and select “Power Options”

➔ Select “Change plan settings” for designated power plan

→ Select “Change advanced power settings”

- Scroll down and locate “USB Settings” and in the drop down section there will be another section that says “USB selective suspend settings”.
- Please change settings for “battery” and “plugged in” to disabled. After making these changes, please press “Apply”.
